

Elevator Bucket Belts

Products:

We have you covered from Head to Tail... Belting, Buckets, Pulley's, Fasteners, and Technical expertise.

STEP 1. Measure Your Elevator Bucket Most manufacturers identify part sizes by molding dimensions into the bottom of the elevator bucket.

LENGTH

The bucket length is measured at the back mounting surface. Lay the bucket on its back for actual measurement dimensions.

PROJECTION

Projection is measured vertically to the lip, as it would project from the belt or chain.

DEPTH

Depth is measured for the overall side profile dimension.

STEP 2. Select Your Bucket Style There are two main categories of elevator buckets; agricultural and industrial.

STEP 3. Choose Your Bucket Material Buckets are available in the following materials: Polyethylene, Nylon, Urethane, FDA Nylon, plus ductile iron and steel for industrial applications.

Winged and lagged drum pulleys
